

Rudra Narayan Maharana

Aspiring Software Engineer | Full Stack Developer (MERN) | DSA Enthusiast

+91 7205094809 | rudra1337.dev@gmail.com | github.com/rudra1337-dev

linkedin.com/in/rudra-narayan-maharana | rudra1337-dev.vercel.app | Bhubaneswar, Odisha

Summary

Second-year Computer Science student with a strong foundation in Data Structures and Algorithms and backend development. Experienced in building scalable MERN applications with real-time capabilities and improving API performance by ~20%. Passionate about problem solving, continuous learning, and collaborating to build impactful software systems.

Technical Skills

Languages: C, Java, JavaScript

Frontend: React.js, HTML, CSS, Bootstrap

Backend: Node.js, Express.js, REST API Development, Middleware, Routing, Authentication (JWT, bcrypt - used in hackathon projects)

Database: MongoDB, Schema Design

Tools: Git, GitHub, Postman

Core: Data Structures & Algorithms, OOP, Web Security, Problem Solving, API Design, Asynchronous Programming (Promises, async/await)

Education

B.Tech in Computer Science and Engineering

Gandhi Institute of Technology and Management | 2024–Present | CGPA: 8.0

Relevant Coursework: Data Structures, Operating Systems

Class XII: 73% | Class X: 80%

Highlights and Achievements

- Finalist, BPUT Hackathon 2025
- Collaborated in 3+ hackathons, building full-stack applications under strict deadlines and team environments
- Solved 180+ Data Structures and Algorithms problems on [LeetCode](https://leetcode.com)

Projects

GateCrowd

- **Tech Stack:** MongoDB, Express.js, React.js, Node.js
- Designed and developed a real-time crowd management system aimed at improving visitor experience at high-traffic locations such as Jagannath Temple
- Enabled **real-time data synchronization** supporting 20+ concurrent users using efficient backend architecture
- Built and optimized **scalable RESTful APIs**, reducing response time by ~20%
- Implemented structured schema design and efficient routing to ensure system scalability under peak usage
- Independently handled full-stack development, including backend logic, API design, and frontend integration
- **Live:** gatecrowd.vercel.app
- **GitHub:** github.com/rudra1337-dev/gatecrowd

Clock App

- **Tech Stack:** HTML, CSS, JavaScript
- Built a responsive clock application with **timer, alarm, and stopwatch functionalities**
- Enhanced user experience with interactive UI across **3 functional modules**
- Implemented efficient DOM manipulation and event handling for smooth performance
- **Live:** rudra1337-dev.github.io/Clock-APP
- **GitHub:** github.com/rudra1337-dev/Clock-APP
